Professional Summary

Motivated and enthusiastic Computer Science student at the University of Dundee with strong foundations in software development, object-oriented programming, and web technologies. Experienced in Python, C, C++, and Java, with practical experience in developing scalable applications and algorithmic problem-solving. Skilled in collaboration, version control, and delivering high-quality solutions. Eager to join Red Bull Racing's innovative development team and contribute to performance-driven projects.

Education

University of Dundee — *BSc (Hons) Computer Science (Data Science and AI) with Industrial Placement*
Sep 2024 – Jun 2029

- Key Skills: Java, Python, Object-Oriented Programming, Algorithms, Data Structures, SQL basics, Web Development fundamentals (HTML, CSS, JavaScript)
- Projects:
    - **Student Management System** – Designed and implemented a system to efficiently manage student records, including adding, updating, and searching for information.
    - **Scrabble Game** – Developed a console-based game in Java applying OOP principles, focusing on algorithmic efficiency and scoring logic

---

Experience

Tesco — *Retail Assistant (Part-time)*
May 2025 – Sep 2025 | Westhill, Scotland

- Developed strong teamwork and problem-solving skills in a customer-focused environment.
- Assisted in day-to-day operations, ensuring efficient service and store management.

Technical Skills

- **Programming Languages:** Python, Java, C, C++
- **Web Development:** HTML, CSS, basic JavaScript/TypeScript
- **Frameworks/Tools:** Git, GitHub, Version Control
- **Concepts**: Object-Oriented Programming, Algorithms, Data Structures, Software Design
- **Soft Skills:** Problem Solving, Teamwork, Communication, Time Management, Adaptability

---

Projects

Student Management System – University of Dundee (Oct 2024)

- Developed a software system for efficient management of student records.
- Implemented functionalities to add, update, and search student information.

Scrabble Game – University of Dundee (Dec 2024)

- Designed and implemented a console-based Scrabble game in Java.
- Applied object-oriented principles to manage tiles, scoring, and player turns.
- Focused on algorithmic efficiency for word validation and score calculation.

Interests

- Software Development & AI
- Technology & Innovation
- Problem Solving & Coding Challenges
- Strategic Games (Chess)
